Enhancement 1: Integration of Prognosis CIS with HubSpot Resource Center via Single Sign-On

Module:	EMR+PM
---------	--------

Type:	GENERIC
Case ID:	NA
Affected screens:	NA
Description:	<p>This release introduces seamless integration between Prognosis and the HubSpot Resource Center, enabling users to access the Resource Center directly from Prognosis without separate login credentials.</p> <p>Key Enhancements Implemented:</p> <ol style="list-style-type: none"> <p>1. Single Sign-On (SSO) – Automatic Login A secure SSO mechanism allows users to access the HubSpot Resource Center by clicking the <i>Resource Center</i> button in Prognosis. Users are automatically authenticated in the background and logged in without any additional steps or login prompts.</p>  <p>2. Automatic Account Creation User accounts in the HubSpot Resource Center are automatically created upon first access. The system uses user details such as email (auto-generated), first name, last name, and clinic ID. If an account already exists, the system recognizes it and allows access without duplication. In case of failure during account creation, users see an authorization error message and access is restricted until the issue is resolved.</p>

3. Smart User Record Management

A local record of users with existing HubSpot accounts is maintained to optimize performance. The system checks this record during login to avoid repeated account creation requests, ensuring faster and more efficient access for returning users.
